The Ultimate
Driving Machine

**Convertibles are made for the sun.
This one is for the billions of other stars too.**

The night just gained another attraction.

Put the city lights in the shade.

**The new BMW 1 Series Convertible. Frugal
on fuel. Generous on dispensing adrenalin.**

The beauty of this convertible is seen afresh each and every morning.

It's not the comfort of your back that determines how long you sit in this car. It's your sun protection factor.

Only features that enhance driving pleasure are admitted: the **electric roof** provides effective insulation of the cabin against noise and can even be opened while driving up to a speed of 40 km/h. The roof is optionally available in Anthracite with a unique silver effect: fibres woven into it lend it a metallic shimmer in the light – for a dazzling presence. Your preferred personal climate is catered for by the **automatic air conditioning** with special convertible mode and separate temperature

settings for the driver and front-seat passenger. At night or in poor visibility, the optional Xenon headlights (standard on 135i) illuminate the road ahead noticeably better. They include daytime driving lights as well as four parking light rings and automatic headlight range control. Only available in conjunction with **Xenon headlights** (standard on 135i) is the special option of **adaptive headlights with integrated turning lights**. These illuminate each curve as soon as the driver turns into it.

And to ensure that you are free of draughts while driving with the top down, a **wind deflector** (available through BMW Accessories) protects you from any turbulence in the shoulder and neck area. USB stick and MP3 player can be connected via the **USB/audio interface**, which comes with a practical multimedia pocket for your MP3 player in conjunction with the front armrest. The **rear lights** each comprise three individual high-performance LED light rods that accentuate the sporty aspect of

the rear end. The car's dynamic appearance is also underlined by the optionally available **BMW light-alloy wheels star-spoke 262** with mixed tyres, 7 J x 17" with 205/50 R 17 tyres at the front, 7.5 J x 17" with 225/45 R 17 tyres at the rear (standard on 125i, not available on 135i). The **through-loading system** from the luggage compartment to the rear, includes a transport bag and is perfect for transporting, for example, your snowboard or skis conveniently and safely.

■ Standard equipment □ Optional equipment — Not available NCO No Cost Option

Safety	120i	125i	135i
Airbags:			
– Driver and front passenger airbags	■	■	■
– Side airbags for driver and front passenger (integrated in seatback), including head-thorax airbag	■	■	■
Anti-lock Brake System (ABS) , incl. braking assistant and Cornering Brake Control (CBC)	■	■	■

Highway	l/100 km	6.2[6.2]	6.8[6.8]	7.4[7.3]
Combined	l/100 km	8.1[8.2]	9.1[9.1]	9.8[9.8]

All dimensions of the technical drawings in millimetres.
Luggage compartment capacity (VDA method): 260–305 litres

* Preliminary technical data, November 2007.

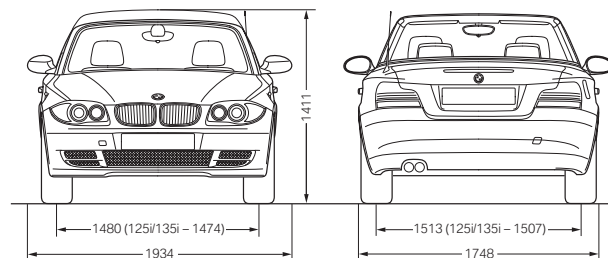

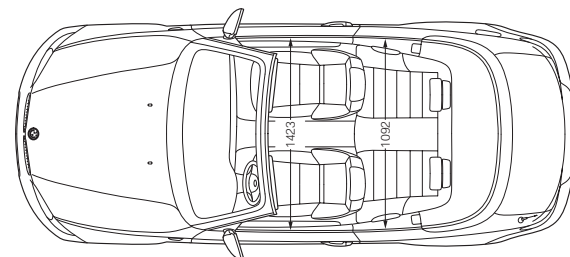

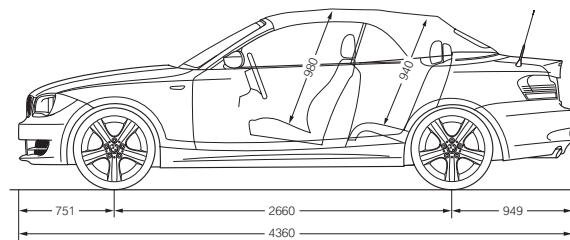

¹ The Kerb Weight² or Unladen Mass is the mass of the vehicle in running order unoccupied and unladen with all fluid reservoirs filled to nominal capacity including fuel, and with all standard equipment.

² The petrol engine is designed for RON 98 fuel. They may be run on RON 91 fuel, with a decrease in power.

³ Based on the ECE driving cycle (80/1268/EWG) made up of approximately one third city and two thirds highway driving (based on the distance covered). Standard equipment was used for measuring consumption. Optional equipment (for example wider tyres) or manner of driving can significantly influence consumption levels.

Values in [] apply to vehicles with six-speed automatic transmission.
